

## Questions and Answers Round 2:

1. Can you tell us the internal number infrastructure devices to be scanned?

YVL has approximately 35 internal infrastructure devices.

2. What type of network infrastructure devices are in your environment? (i.e. Cisco, Juniper)

Infrastructure devices in our environment include Cisco, Dell, Netgear, and D-Link.

3. What is the number of live IP's to be scanned?

Live IPs estimated at 600.

4. Scope item 2.B. states you want a review of IT Security Policies and practices, What standard do you want the assessment team to compare you to (NIST CSF? ISO 27001)?

We are interested in a review with a professional recommendation based on the standard(s) applicable to our organization as a rural library district that is a junior taxing district within Yakima County of Washington State.

5. Do you currently have a backup solution in place? (i.e. Dell, Commvault)?

Yes, we are currently using a backup software solution from BackupAssist.

6. Is this work to be conducted on site or is there an opportunity to perform this remotely?

We have no preference as to whether the work is conducted onsite or remotely.

7. Do you want a physical security review to be conducted onsite?

No, a physical security review is not included as part of the request for quote.
