

Subject: RFQ-136 Vendor Question & Response

Questions:

1. Is Inpro WT243 an acceptable substitute for Hunter Douglas RB500?

Answers:

1. The Inpro WT243 commercial window treatment will be accepted as an approved substitute for the Hunter Douglas RB500 with Sheer Weave 2410 fabric. However, the proposed substitute may receive a lower evaluation score for overall quality, long-term durability, and its ability to maintain a consistent appearance with our large windows due to differences in the material composition.
